Customized
Fabric as an
Architectural
Element

Fine Painting is the vendor to choose when it comes to installing high quality materials to ensure premium acoustic fabric panel sound systems. Each room layout requires different sound solutions to meet its exact specifications. Fine Painting will guide you towards the product that fits your needs with proven manufacturers. We will install the panels, fabrics and wall systems for expert results that will solve your sound problem. Whether you want to ensure sound stays in your room or that you are precisely heard within that room, Fine Painting will deliver the high performance satisfaction you need.

SOUND ADVICE FOR SOUND PROBLEMS

Let our experts walk you through the steps needed to ensure sound efficiency. The sound systems we install will dampen nearby noise or keep in the sounds from presentations or music that need to be heard at high quality levels. Our experts will help you decide on the options and materials that will best serve you. Your room's specifications, the installation methods best suited for your product choice, the designs and products best for your needs - these are the concerns we will guide you through.

(((Insulating Sound)))

with Acoustic Integrity

SOUND SYSTEM OPTIONS:

CUSTOMIZED FABRIC AS AN ARCHITECTURAL ELEMENT

Create a customized sound system that not only delivers acoustic clarity but also lends an attractive design element to your room. Fine Painting will develop a customized track of fabric panels designed to your specifications (color, texture, size) compiled of unique patented products. Our expert installation team will fit, assemble and install the system right on-site. Be guaranteed that all the pieces are aligned and that the interior is assembled properly with customized service from assembly to sound with our Acoustical Consultant.

Customized Quality Advantages:

- Precision Engineering
- Acoustical Adjustment on-site
- Fabric Flexibility (texture, color, design, shape)
- On-site adjustments for exact measurements
- Patented Quality Assurance

PRE-FABRICATED SOUND SYSTEMS

When a room has a standard layout or basic needs for the design and look of its sound system, a factory assembled sound system might be the perfect model. Fine Painting's experts will advise you on the products that are best for your company and most appropriate for your budget. The high quality of a pre-fabricated sound system has our quality assurance and is installed on-site.

Standardized Pre-Fab Advantages:

- Standard Size Availability
- Material Flexibility
- Quality Assurance
- Cost Effective Alternative
